DETAILED ACTION

1. Information Disclosure Statements filed on 12/06/01 and 6/7/02 have been received. Priority Papers filed on 3/19/02 have been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Schafer (DE2800630).

See figure 3 cylinder 1, rod 2, piston 8, conical valve body 11, spring 10, axially adjusted stop beneath the conical valve body threaded onto the piston

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schafer.

Regarding claim 5, Schafer is relied upon as above. Schafer does not disclose the valve body made of plastic. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use plastic for the valve body as such is merely a design choice.

Regarding claim 5, Schafer is relied upon as above. Schafer does not disclose the separating piston arranged on the piston rod in figure 3. Schafer discloses the separating piston arranged around the piston rod in figures 1 and 2. It would have been obvious to one of ordinary skill in the art at the time the invention was made to arrange the separating piston around the piston rod as such is merely a design choice.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schafer in view of Funkhouser (U. S. Patent no. 2,458,157).

Schafer is relied upon as above. Schafer does not disclose the use of a conical spring wherein the flow path coming from within the end coil. Funkhouser teaches the use of a conical spring wherein the flow path coming from within the end coil in a damper. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a conical spring wherein the flow path coming from within the end coil as taught by Funkhouser in the damper of Schafer as such is merely a design choice.
